

Athletic Park Inventory

Class	Description/ Characteristics
A	Class A sports field are the premier fields in the community, used for high-level games, significant tournaments, and city events that attract larger crowds. The field is maintained to a higher standard. Grass is kept in good condition, or may have a synthetic surface. Basic amenities include seating, small changing rooms and lighting.
B	Class B fields are spaces primarily used for league games, practices, and community tournaments. These fields are well-kept, though they may have more wear than a Class A field due to moderate use and less frequent maintenance. Amenities include some seating and possibly lighting but are more basic, with only the essentials like benches and field markings.
C	Class C fields are located on school district sites, they are maintained by the school district but booked through the City for community use. These fields serve recreational needs, supporting casual leagues, school practices, and informal games. Maintenance is basic, ensuring the field remains safe and usable, though the grass or surface may show moderate wear. Amenities are minimal, limited to benches with no lighting or additional facilities.
Community	These fields are the most basic in terms of quality and upkeep, often with natural grass that sees minimal maintenance aside from periodic mowing and upkeep for safety. There are little to no amenities, and any seating is limited and informal.
