

**BACKGROUND
MAYOR CUMMING – NOTICE OF MOTION
SPEED BUMPS ON EASTSIDE ROAD**

REGULAR ADMINISTRATION UPDATES – FEBRUARY 13, 2023

Speed humps at Hurlburt Park and other parts of the City

At its Regular Meeting of January 23, 2023, Council inquired whether the speed humps at Hurlburt Park have been effective at slowing motorist speeds, and whether they could be applied on other roads within the City. In order to complete the review of the speed humps at Hurlburt Park, Administration would have to install data collection equipment during summer months on Eastside Road adjacent to the park and then complete data analysis. To review whether speed humps could be installed on other roads within the City, Administration would have to complete further review on potential implications (e.g. road maintenance, emergency access) and prepare amendments to the City's Neighbourhood Traffic Management Policy for Council's consideration. However, this work is not included in current workplans or budgeted for in 2023.
