In regards to rezoning 4701 pleasant valley road mobile home park to allow 12 more units, extensive mapping and reporting was done by Silver star gateway project that this area was an important movement corridor by the environmentalist. How can one project be approved with stipulations in effect, then changed? There are numerous wildlife that move through there, also specific vegetation, allowing this variance to go forward will jeopardize this movement corridor. I oppose this application, the city needs to protect its wildlife and native species. You can't approve one way, then change your mind a few years later. I speak for the wildlife, because they sure can't!
